

KONGRESSEJA

INTERNATIONAL CONFERENCE ON FINITE ELEMENTS IN NONLINEAR SOLID AND STRUCTURAL MECHANICS, CEILO, NORWAY, 29/8...1/9, 1977

The aim of the Conference is to bring together scientists and engineers who are interested in nonlinear finite element analysis in solid and structural mechanics. The Conference will deal with large displacements, material nonlinearities and structural instabilities. The Conference welcomes contributions in form of research papers and special lectures will be given by invited researchers. The Conference language is English.

Authors are requested to submit a summary of 300 to 500 words no later than February 18, 1977.
